Market Problems

- ✗ Lack of creativity and productivity
- ✗ Lack of usability
- ✗ Lack of interactive participation
- ✗ Lack of collaboration

Our Solution

PARTICLE PROTOCOL

What is ParticleProtocol?

Container

A protocol that defines **NFT as a container**.

Programming

A protocol that implements NFT **Meta-Programming**.

Collaborative

A protocol that creates **Bottom-up user collaborative production mode**.

Platform

A platform where users can create, register, **merge and split** their NFTs.

On Chain Programming for all NFTs

Particle's kit composition

Particle Core

Particle Core is the core implementation of Particle Protocol, which defines the standard interface of smart contracts and the specification of metadata. Provides different types of Particle NFT implementations.

Particle.js

Particle.JS is a collection of libraries that allow you to interact with Particle NFT using HTTP, IPC or WebSocket. Through Particle.JS you can implement the creation of Particle NFT and the operation of synthesis and splitting.

OpenSea Plugin

Particle NFT can be traded on OpenSea. Since Particle Protocol is a new NFT-oriented synthesis protocol, in order to facilitate everyone's experience, it supports the OpenSea web plug-in, which allows you to experience new functions, and at the same time ...

MetaRune IDE

MetaRune is IDE of Particle NFT. Support the development of different types of Particle NFT. Support the processing of external calls. NFT meta-programming is fully supported. Can be used for collaborative creation of multiple users.

Particle Client

Particle Client is a specific product implementation, including Web,iOS and Android apps, which can perform user operations such as particle creation, claim, synthesis, and splitting.

Roadmap

Particle Platform - MarketPlace

The screenshot displays the Particle Platform MarketPlace interface. At the top left is the MP logo. A search bar with the placeholder "Search particles..." is positioned above a sidebar menu. The sidebar menu includes links for Transfer, Mirror, Dex, Mining, Lending, Assets, AD, Chatting, Magic, Music, Short Video, Media, Game, UI, and Merge. At the top right are links for Explore, MagicRoom, Create, Register, and user icons.

The main content area shows a grid of 12 cards, each representing a different particle effect or filter. The cards are arranged in three rows of four. The first row contains:

- HORIZONTAL FLIP**: A pink card featuring a large white "HORIZONTAL FLIP" text. It has a "Claim" button at the bottom.
- ROTATE**: A dark blue card featuring a large white "ROTATE" text. It has a "Rotate" button with a circular progress bar and a "Claim" button below it.
- VERTICAL FLIP**: A dark purple card featuring a large white "VERTICAL FLIP" text. It has a "Vertical Flip" button with a circular progress bar and a "Claim" button below it.
- FOUR-FRAME COMICS**: A purple card featuring a large white "FOUR-FRAME COMICS" text.

The second row contains:

- A light gray card showing two leaves, one orange and one green.
- GIF GENERATOR**: A light blue card featuring a large white "GIF GENERATOR" text.
- COLOR CATEGORY**: A dark gray card featuring a large white "COLOR CATEGORY" text.
- OVERLAY**: A dark blue card featuring a large white "OVERLAY" text.

The third row contains:

- LEFT**: A pink card featuring a large white "LEFT" text.
- TOP**: A purple card featuring a large white "TOP" text.
- ***: A gray card featuring a small white asterisk symbol.
- BOTTOM**: A purple card featuring a large white "BOTTOM" text.

A "Most Favorited" dropdown menu is visible in the top right corner of the main content area. The background features a digital binary code pattern.

Particle Roadmap

Q4 2021

Particle v0.1 (completed)

Define the technical specifications and interface standards of Particle NFT, including the structure definition, synthesis and rendering methods of Particle NFT metadata, and contract interface standards. It also defines the structure of a composite application based on the Particle specification. A proof of concept is completed on this basis.

Q2 2022

Particle v1.0

- Launch Particle Core and Particle DApp
- Opensea Plugin
- Magic & UI & DeFi Particle NFT
- Particle NFT MarketPlace

Q3 2022

Particle v2.0

- Game/Advertisement Particle NFT
- \$Particle Token Release
- Particle NFT Secondary MarketPlace
- Customizing Particle NFT for specific NFTs

2023

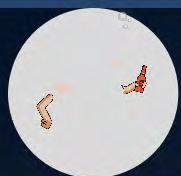

Particle v3.0

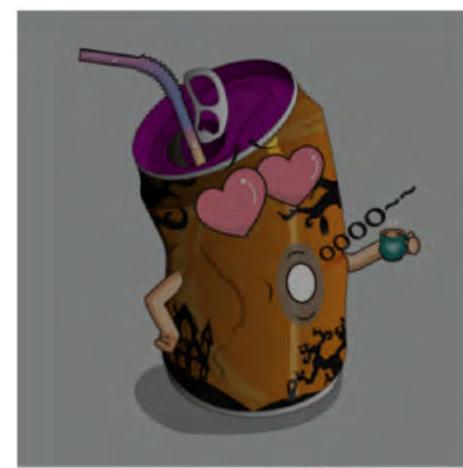

- Chat/Short Video/Media Particle NFT
- Provide comprehensive assistance to developers
- Launch MetaRune IDE

MadCanner

MadCanner - DApp

[← Back to Home](#)

WELCOME TO MAD CANNER

In 2140, people in the encrypted digital world lived on a meta-universal planet called Particle planet. That planet was sunny and fragrant every day. Thecanned people livingthere could do what they like, drink coffee, plant flowersand plants. Dating with friends. What's even more amazing is that the cannerson Particle planet can obtain immortality through technology. Every part of their body can be upgraded and replaced, and they can go to the market to buy their favorite skins and even their eyes.

[Claim for ₿ 0.01](#)

Key Differences

World's First Synthetic NFT

A MadCanner is composed by 8 parts and all parts are NFTs. User can easily **merge, split and replace** parts without changing its token ID

Infinity Game

Unlimited merge and split with **Particle NFTs**. For example: merge MadCanner with Music NFT and let MadCanner sing a song.

User Generated Avatar

With **Particle Protocol**, user can create their own parts and merge with MadCanner to create a unique Avatar by themselves

MadCanner - Roadmap

- Q2 2022 ○ **MadCanner NFT Release and Launch MadCanner MarketPlace.**
The 10,000 Unique synthetic NFTs support merging, splitting, replacing parts, and sealing the MadCanner. The marketPlace is where users can buy and sell their MadCanner or Parts that are more secure and cheaper.
Launch Opensea Plugin: Make up for the lack of Opensea's support for synthetic NFTs
- Q3.2022 ○ **MadCanner with UGC Gamefi**
MadCanner Bomber will be the first gamefi using ParticleProtocol, fully developed and operated by the community. Users can play to earn and build their own gamefi: map, bomb effect, etc.
- Q4.2022 ○ **MadCanner Dao**
MadCanner will be entirely operated by the community. The community can decide where MadCanner goes and what we should build next. More applications based on MadCanner will be launched: MadCanner MusicFi -- KAKA Land & Particle Potion NFTs
- 2023 ○ **MadCanner Matrix**
MadCanner as Metaverse Enter Cannerverse by simply clicking the MadCanner. The owner will define and design their Cannerverse: a DApp, a Music studio, a Game, or a Home.
